

SolidData

Panel book in the Baltic states

- »» SolidData online panel is actively-managed and built from scratch. Panel is research-only, wholly owned and built in a consistent manner to ensure that the panel is responsive, balanced and reliable – the foundations for a quality research. Panel management is compliant with all relevant market research industry standards, data protection and privacy laws.

SolidData panels are proprietary panels. We are not a panel aggregator. SolidData proprietary online access panels are managed exclusively for SolidData researchers, providing greater control over the type and frequency of surveys delivered to individual panellists.

SolidData client list includes marketing and research agencies as well as international research companies that don't have their own panels in the Baltic States. Delivering to clients with specific needs for technical programming and a demand for high quality standards, SolidData has gained an excellent experience in implementing various research projects during past 6 years.

- »» Price for a sample is calculated based on 3 main criteria:

- »» Samples for online studies are drawn from the panel according to client's specification (either demographically representative, or targeted) and randomly selected within the data base, according to the quotas set in the questionnaire.

SolidData can target the respondents based on various criteria:

- If the required criteria are based on already known socio-demographic profile within our data base, we can target directly those respondents that correspond to these criteria.
- If the required criteria is very narrow (e.g. users of Fructis shampoo), we usually add a filter question at the beginning of the survey.

Online panel recruitment

During the recruitment process the new panellists are informed and they agree to participate in the market research surveys. Voluntary basis come and go.

Regular panel screening to remove unresponsive and low-quality panellists

Representative to the national population

Online panel quality

Unique respondents

Respondents are who they say they are.
Screening of e-mail addresses.

Honest respondents

Participating in the study, respondents give honest answers and avoid giving misleading answers.

Engaged respondents

Provide well thought-through answers and avoid giving superficial answers (eliminating speeders and straightliners).

Professional respondents

To avoid fake or duplicate participation in the surveys aimed to receive higher chance in the prize draws, SolidData carefully selects prize schemes. Among others, SolidData regularly organizes surveys with no prize or bonus schemes.
